SUMMARY

Software Developer with 2+ years of experience building full-stack web and native mobile products, from requirements to production. Strong in TypeScript, React, Node.js, AWS and Android development, and currently studying for the AWS Certified Developer - Associate.

WORK EXPERIENCE

Vypr Validation Ltd **Jul 2024 - Present**

Software Developer *Manchester, United Kingdom*

- Own features end-to-end, from reviewing product pitches, producing estimates and scoping requirements with product and design, to building, testing and releasing them. Shipped 8 features to production so far.
- Design and build the Node.js and TypeScript APIs behind each feature, including DynamoDB data modelling and S3 file handling.
- Build responsive, accessible user interfaces with React, TypeScript and Mantine, including reusable components and custom hooks with 85% test coverage using React Testing Library. Design application architecture (folder structure, separation of concerns) to keep the codebase maintainable as it grows.
- Develop and maintain the native Android app using Kotlin, Java, XML and Jetpack Compose, including REST API integration, local data storage and caching.
- Write unit tests with JUnit and Mockito and manage releases through Google Play Console, including versioning, signing and rollout strategy.
- Help maintain the iOS app alongside core Android and web development.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Kotlin, Dart, SQL, PHP

Frontend & Mobile: React, React Native, Next.js, Mantine, Flutter, HTML, CSS

Backend & Cloud: Node.js, AWS (DynamoDB, S3), Firebase (Firestore, Remote Config, Crashlytics), Supabase

Testing & Tools: JUnit, Mockito, React Testing Library, Git, Figma

Currently Pursuing: AWS Certified Developer - Associate

PROJECTS

StaffToDo: Task Management App for Small Businesses **Jun 2026 - Present**

React Native, TypeScript, Supabase

- Designing and building a cross-platform task management app for small businesses, handling everything from product design to release.
- Built with React Native and TypeScript, using Supabase for authentication, data storage and real-time sync.
- Grew to 100+ daily active users across 6 paying businesses.

Repem: Social Fitness Tracker **Nov 2025 - Jan 2026**

Flutter, Dart, TypeScript, React

- Designed and built a cross-platform social fitness tracking app using Flutter and Dart.
- Implemented state management with Riverpod to keep business logic separate from the UI and make the app easier to test.
- Built a responsive landing page with Next.js and TypeScript, optimised for performance and SEO.

Hijra: Prayer Room Locator **Sep 2023 - Jul 2024**

Flutter, Dart, Firebase

- Designed and built Hijra, a cross-platform mobile app for finding prayer rooms, covering research, planning and release on Android and iOS.
- Used Firebase Firestore to store prayer room locations and Firebase Authentication to handle user sign-in securely.

EDUCATION

Queen Mary University of London **London, United Kingdom**

BSc Computer Science, 2:1 Honours *Graduated Jul 2024*
